LAUNDRY MIS · DGMH UP

CMS User Manual

For the Chief Medical Superintendent / Director of the hospital

Directorate General of Medical & Health Services, Uttar Pradesh

Version: October 2026

1. Your role in Laundry MIS

Laundry MIS records the linen washing work done by the laundry firm (Service Provider) for your hospital and turns it into the monthly bill. Every week the hospital scores the firm's service in a Weekly Performance Report (WPR). As CMS you check each WPR, correct a score if it is wrong, and verify it.

> **Why it matters:** Only WPRs verified by the CMS count for the firm's bill and the hospital's payment. A WPR that is still Pending is left out of every calculation.

- Each hospital has exactly one CMS login.
- You see only your own hospital's WPRs and bill disputes.
- You never reject a WPR: if a score is wrong you correct it yourself, with a reason.

2. Getting your login

1. The Admin (DGMH Directorate) creates the CMS login of your hospital and gives you a password. The password is shown to the Admin only once.
2. If you lose the password, ask the Admin to reset it. Nobody, not even the Admin, can look it up.

3. Signing in

1. Open the Laundry MIS home page.
2. In the Sign in box choose User type: CMS (or use Login → CMS in the menu bar).
3. Choose your District, then your Hospital.
4. Enter the password and click Sign in.

First sign-in: change the password

On your first sign-in the Change Password page opens before anything else. Enter the password the Admin gave you in Current password, type a new password twice (New password, Confirm new password) and save. After that the CMS Dashboard opens. You can change the password again at any time from Change Password in the menu.

> **Safety:** After too many wrong passwords the account is locked for a few minutes. Wait and try again, or ask the Admin to reset the password.

4. The menu

Menu item	What it is for

Dashboard	Counts of pending and verified WPRs and open disputes, and the list of WPRs waiting for you.
WPR Verification	All WPRs of your hospital, with filters; review a WPR or verify a whole month.
Bill Disputes	Disputes raised by the laundry firm on your hospital's bills (view only).
Change Password	Change your own password.

Use the ☰ button at the top left to open or close the menu, on a computer as well as on a phone. Use Logout at the top right when you finish.

5. The CMS Dashboard

- Pending – WPRs submitted by the hospital and waiting for your verification.
- Verified – WPRs you have already verified.
- Open disputes – bill disputes raised by the firm and not yet closed by the Admin.
- WPR waiting for you – a list (latest month first) with Month, Week, Vendor, Score and Submitted date. Click Review to open a WPR.

Clicking a count opens the WPR Verification or Bill Disputes list already filtered.

6. Reviewing and verifying a WPR

1. Open a pending WPR with Review (from the Dashboard or the WPR Verification list).
2. The page shows the ten parameters with the hospital's score for each, the hospital's remarks, and the live total with its payment band.
3. If a score is wrong, change it (0 to 10). Whenever you change a score you must write the reason in Reason for the change.
4. Click Verify & Accept to save your changes and verify the WPR. Or click Save changes only to save the edits and keep the WPR Pending for later.

> **A verified WPR is locked:** After Verify & Accept nobody can edit the WPR any more – not the hospital and not the CMS. It can be changed only by the Admin through a bill dispute.

The ten parameters

#	Parameter (scored 0 to 10)
1	Hospital linen quality after wash
2	Timely supply of clean and washed linen
3	Washing procedure / formula and quality consumables followed
4	Laundry personnel displaying photo ID card
5	Behaviour of laundry personnel towards hospital staff and patients
6	Personnel found smoking / drinking / sleeping during duty
7	Personnel found on duty other than the approved list
8	Breakdown of equipment
9	Alternate arrangement during equipment breakdown
10	Number of warning letters issued by the hospital authority

Each parameter is scored 0 to 10 (Good 7–10, Average 3–6, Poor 0–2), so the total is out of 100. Some parameters are filled in by the portal from the delivery data and are marked Auto calculated.

How the total becomes the payment

Total score (out of 100)	Share of the monthly bill that is paid
0 – 20	0% (nothing)
21 – 40	40%
41 – 60	60%
61 – 70	80%
71 – 80	90%
81 – 100	100%

The firm's monthly score is the average of the verified weekly scores of that month.

The change log

Every score you change is recorded: parameter, old and new score, old and new total, who changed it, when, and the reason. The log is shown at the bottom of the WPR page and can be seen by the hospital, the CMS and the Admin.

7. WPR Verification list

- Filter by Status (Pending / Verified), Month and Year and click Filter.
- Each row shows Week, Month, Vendor, Score, Payment share, Submitted date and Status.
- Click Review to open a WPR.

Verify a whole month

When a month still has pending WPRs, the box Verify a whole month shows a button for that month. Clicking it and confirming verifies every pending WPR of that month exactly as the hospital submitted it.

> **Be careful:** Use this only when you have checked the scores. To change a score first, open that WPR with Review.

8. Bill disputes

After the firm prints its monthly bill it can raise a dispute if it thinks a score or the bill is wrong. Bill Disputes shows the disputes of your hospital: bill month, vendor, the firm's remark, status (Open, Resolved or Rejected), the date it was raised and the outcome.

- Only the Admin closes a dispute. To correct a verified WPR the Admin needs a letter from the CMS, so the Admin may contact you for it.
- When a dispute is resolved, the CMS letter can be opened from the list (CMS letter link).
- The corrected scores appear in the change log of the WPR under the Admin's name.

9. Good practice

- Verify WPRs every week, so the firm's bill is not held up.
- Write a clear reason for every changed score – it is permanent and visible to others.

- Never share your password. Change it if you think someone else knows it.
- Always click Logout when you finish, especially on a shared computer.
